“ Dr. Trowbridge was my master's thesis advisor at Emory in the early 90's. I have so many fond memories and so much of my career was shaped by the two years we worked together. He was my first real mentor and I cherish all of the time we spent together. We (all of us that had him for P. Chem lab 1989-90) used to call him Yoda because he knew everything about everything. He actually enjoyed the nickname. I am a better person and a better scientist because of him.

Sincerely,
